

**SieviSCANNER**

## **SieviSCANNER ESD Footwear Measuring Service**

SSE offer companies a free, no obligation, on-site foot measuring service in conjunction with Sievi, using the **SieviSCANNER**. On request, a representative from Sievi will bring the scanner to your site to measure and record the foot sizes of anyone requiring Sievi shoes.

The state-of-the-art laser SieviSCANNER measures both feet at the same time for length, width, size and height of the foot arch - it then recommends the best matches for style, size, width and insole, ensuring that everyone gets comfortable ESD footwear that fits correctly.

If you are not completely satisfied with the shoe that has been recommended by the SieviSCANNER, you can return the shoe and pick another style (\*).

**Contact us at [sse@staticsafe.co.uk](mailto:sse@staticsafe.co.uk) or [01384 898599](tel:01384898599) to arrange a measuring service at your site.**

Please note that this service is offered to commercial organisations wishing to purchase ESD shoes for staff and is not available to private individuals.

\*Any shoes returned must be unworn (apart from trying on with a clean floor) and in a resalable condition including the box.
